Supplementary Online Content

eFigure 1. Anatomical Analysis in Cadaveric Dissection
eFigure 2. Diagrammatic Sketch of the Cruciate Overlap Technique Combined With Augmentation Maneuvers

This supplementary material has been provided by the authors to give readers additional information about their work.
eFigure 1. Anatomical analysis in cadaveric dissection.

The cephalic portion of LLC can be dissected, rotated, and overlapped.
eFigure 2. Diagrammatic sketch of the Cruciate Overlap Technique combined with augmentation maneuvers.

The Cruciate Overlap technique can be performed in combination with silicone or cartilage onlay and columella graft, wrapping the implant as a mattress to intensify the soft tissue envelope. (a) front view; (b) 45-degree lateral view.
